The Committee agreed there is need for a regular input to the Pact in addition to FOI, and concluded that MECQ should be authorized to enter into the regular contact with the Zimbabwe Government for transmitting factual information received, so that the force of the argument is not impaired by a change at a later date of the views of the committee and of the public opinion.
In recognition of the hazards that accompany broadcasting, it was agreed that in the event of crisis developments, for example in Poland, the Committee should meet daily to provide guidance both for unattributed broadcasts and VOA.

4. It was agreed that the paper on conditions indicating a phase-out of Polish broadcasts would be considered in the preparation of the country paper to be prepared on Poland.

5. It was agreed that at the next meeting consideration would be given to the question of radio broadcasting in the Near East.

6. A brief discussion was held about the "abnormal meeting" and it was agreed that the Committee should take responsibility for this matter. Mr. Scowen stated that in the meantime no further action seemed to be taken in this.
