Summary:

Soviet Union’s role in fabrication of evidence blaming the US for using biological weapons in North Korea.

Original Language:

Russian

Contents:

- English Translation

In February 1952 the government of the DPRK received information from Beijing that the Americans were using bacteriological weapons in Korea and China and that they [the Chinese] intended to publish their statement about this. At the insistence of the North Korean government, [the] MID [Ministry of Foreign Affairs of the] DPRK decided to publish its own statement first. The Russian text of this statement of the Foreign Ministry of the DPRK, which corresponds to the one which the Chinese government put forward, was made by Petukhov, adviser at the Soviet embassy in North Korea.

The Koreans stated that the Americans had supposedly repeatedly exposed several areas of their country to plague and cholera. To prove these facts, the North Koreans, with the assistance of our advisers, created false areas of exposure. In June-July 1952 a delegation of specialists in bacteriology from the World Peace Council arrived in North Korea. Two false areas of exposure were prepared. In connection with this, the Koreans insisted on obtaining cholera bacteria from corpses which they would get from China. During the period of the work of the delegation, which included academician N. Zhukov, who was an agent of the MGB [Ministry of State Security], an unworkable situation was created for them, with the help of our advisers, in order to frighten them and force them to leave. In this connection, under the leadership of Lt. Petrov, adviser to the Engineering Department of the KPA [Korean People's Army], explosions were set off near the place where the delegation was staying, and while they were in Pyongyang false air raid alarms were sounded.
