THE DERG

1 - At the time of the killing of General Teferi Bente and several Derg members on 3 February Captain Meles Maru, a member of the Derg, was visiting West Africa with an official delegation. He had, at an earlier stage, been ADS to Teferi Bente; and, on hearing of the latter’s death, decided not to return to Ethiopia.

2. Captain Meles subsequently made his way to West Germany. He was there extensively questioned by the German authorities about the Derg; and the Ambassador here has passed to us in confidence a copy of the resultant de-briefing report. From what he has told us of it, it is a most interesting document. As you will see from the enclosed copy, it is in German; and I should be grateful if you could arrange for a translation to be prepared and send to us – if possible by the next confidential bag (leaving London on 21 May)

Translation [From the German]

1. Through the elimination of the moderate wing of the Provisional Military Council of ETHIOPIA on 4 February 1977, of which Brig. Gen. TAFERI BANTE, the acting Chairman up till then, and 6 other influential members had been victims, Lieutenant-Colonel MENGISTU succeeded in asserting himself as the strong man of the Military Government and finally getting himself elected as the new Chairman.

2. Thereby, however, the USSR also succeeded in an important step towards its aim of exerting direct influence as far as possible on the policy of the Ethiopian Government.
This success for the USSR should be attributed primarily to the Soviet Ambassador at ADDIS ABABA, Anatoli RATANOV. Ever since the formation of the Military Council in the summer of 1974 RATANOV has systematically, intensively and repeatedly endeavoured to gain direct influence over individual members of this body.

It is in MENGISTU that RATANOV has finally found a man whom he has been able to corrupt on account of his uncontrolled striving for power precisely with the prospect of one day being able to seize power himself.

In recent months RATANOV has been calling on the PMAC almost daily and making his "recommendations" to them.

Thus, in particular, the policy of Marxism-Leninism announced by the PMAC in December 1976 and pursued by it recently must be attributable to RATANOV’s burrowing activities, just as RATANOV is also the man who is said to have persuaded MENGISTU ruthlessly to rid himself of all his personal enemies. These include the former Head of the Political Committee, Maj, SISSAY, as well as latterly the group around General TAPERI BANTE.

The second man at the Soviet Embassy at ADDIS ABABA, SINITSIN,

Has been described as being just as active as Ambassador RATANOV in the efforts to gain influence. SINITSIN has had on the one hand to conduct and/or interpret at difficult negotiations for his ambassador whose English is described as not very good. On the other hand he has also played an active and independent part in shaping the whole development.

-----------------

Relations between the PMAC and the POO (Provisional Office for Mass-Organization) have varied from the start,

The original aim and task of the POO was merely to examine all possibilities for handing back the power of government to the civilians.

Under the name of (?)MEEGSON (phonetic), the English translation of which is "All-Ethiopian Socialist Movement" and under the direction of HAILE (?)FIDA, the POO had in the course of time developed into a political instrument, and that is why it lost its independence in November 1975 and was put under the Political Committee of the PMAC.

Despite control by the PMAC the power of the POO should not have been or be underestimated.

Thus the death of Major SISSAY, the former Head of the Political Committee, is said to have been partly duff to the fact that he did not have the support of the POO.

It was the same in the case of SISSAY’s two successors

(?)BERHANU and (?)MOGWE. The differences with the POO which were ascribed to
them finally led to their elimination.

By pragmatically assessing the influence of the POO, MENGISTU has in the course of time known how to establish a good relationship with the POO and to range its members behind him, so that now the POO must be regarded as a willing instrument of MENGISTU's.

Contrary to the original intention and to what the West has assumed hitherto, namely that the composition of the Military Council has varied by representatives being sent to it from the various units and the police in turn, it has now been possible to learn on good authority that the personnel comprising the PMAC has never changed from the very beginning.

The number of members of the PMAC has in most cases dropped from 120 originally to 85 at present.

This figure of 85 members is made up as follows:

11 members belonging to the "Standing Committee" (i.e., the Chairman, MENGISTU, the 1st Deputy, ATNAFU and also the 9 chairmen of committees);

22 other members (together with the 11 mentioned above) belong to the "Central Committee"; and another

52 members together with all the others form the "Congress", which thus has more than 85 members
