Summary:

Schedule of the Brazilian delegation during a visit to various cities in West Germany (Bonn, Erlangen, Frankfurt) in February 1973. This mission is regarded as a critical step towards the establishment of the nuclear agreement with West Germany in 1975. The hand-written notes indicate the appointments and the sites to be visited by technical officials, engineers Carlos Syllus, who later became Director for Technology at Nuclebras, David Neiva Simon, who had been involved in the negotiations of the first Angra power plant with Westinghouse, and Ambassador Nogueira Batista, who would later become president of Nuclebras.
