Vietnam, Cambodia, Laos-AND KOREA? AGAIN?

Eighteen years after the truce that halted the fighting in the Korean War, there are STILL 60,000 AMERICAN TROOPS IN SOUTH KOREA. As the focus of United States imperialist aggression shifts from ground to air, from Vietnam, to Cambodia, to Laos, there is a grave danger of an abrupt turn north. There is a grave danger that a new generation of Americans may be embroiled in a second "war that nobody wants" in Korea.

Despite reports of scheduled troop withdrawal from South Korea, the government of the United States has no more intention of reducing its grip on the Korean peninsula — unless it is forced to do so — than it has on Indo-China. The new maneuvers represent no change in policy — only in tactics and personnel.

This is at the heart of the "Nixon Doctrine" strategy. Let

Asians fight Asians in Asia. This is what the ugly word "Vietnamization" means in Vietnam. Let Asians kill one another on the ground while United States forces kill from the air — and pull all the strings from the Pentagon.

In Korea, the operative word is "Japanization," and it is just as ugly. Under American guidance, a remilitarized Japan is being primed to take over the policing job in South Korea (it has already taken over a large part of the South Korean economy, and it is stepping up the repression of the 600,000 Korean nationals living in Japan — the overwhelming majority of whom favor reunification of their homeland).

What are the motives behind this new turn in Korea?

1. To smash the thriving, stable Democratic People's

Republic of Korea (North Korea), which has risen more determined than ever out of the American-made ruins of the devastating war of the 1950s.

2. To prevent the reunification of Korea above and below the 38th Parallel — a reunification overwhelmingly favored by the peoples of both north and south.

3. To maintain any autocratic, repressive government in the Republic of Korea (South Korea) which will sanction United States military bases directed toward the main targets of United States policy — the People's Republic of China and the U.S.S.R., both of which border on the DPRK.

How can Americans express their opposition to these impending ventures in brinkmanship? By insisting that...

THE ONLY WAY TO END THE WAR IN INDO-CHINA IS TO WITHDRAW ALL U.S. MILITARY PERSONNEL AND WEAPONRY FROM INDO-CHINA.

THE ONLY WAY TO PREVENT A NEW WAR IN KOREA IS TO WITHDRAW ALL U.S. MILITARY PERSONNEL AND EQUIPMENT FROM KOREA.

In the belief that concerned Americans must be armed with the facts about Korea; in the belief that the people of all of Korea must have the right to determine their own future without foreign interference, an American-Korean Friendship and Information Center has been established.

It is already functioning with an able group of officers,

and a distinguished roster of initiating sponsors from all areas of American public life, and all opposed to the policy of aggressive American imperialism. It has published a position paper about Korea — OPERATION WAR SHIFT — with a sold-out first printing of 5,000 and a revised edition of 20,000, now ready. It is planning a regular publication to be called KOREA FOCUS, and a

series of forums, exhibitions, concerts of Korean music, campus lectures, and publicity and advertising campaigns.

There is still time to avoid a military confrontation in Korea, but it grows shorter. We ask you to join with us at the American-Korean Friendship and Information Center, and to work with us in this urgent task.

BRING ALL THE TROOPS HOME NOW!
